## SLIPPER TECHNOLOGY

No matter the occasion, type of weather, or time of year, wearing comfortable, proper fitting footwear isn't an option – it's a necessity.

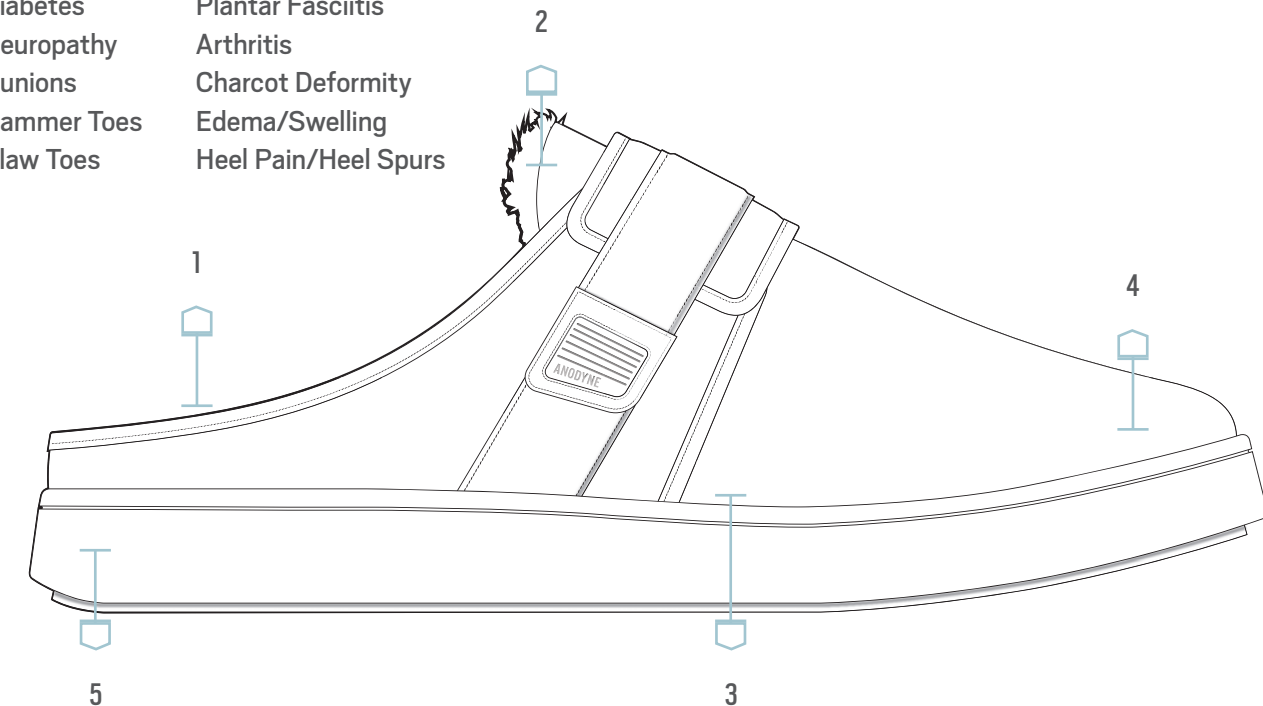

Even when indoors, it's incredibly important to have the appropriate shoes or slippers on. Being barefoot is not an option. Something as simple as stubbing your toe or stepping on a random something can potentially lead to a serious foot complication.

For all your indoor adventures, or lack thereof, our slippers are designed to support you every step of the way.

### IDEAL FOR THE FOLLOWING FOOT CONDITIONS:

Diabetes  
Neuropathy  
Bunions

# SANDAL TECHNOLOGY

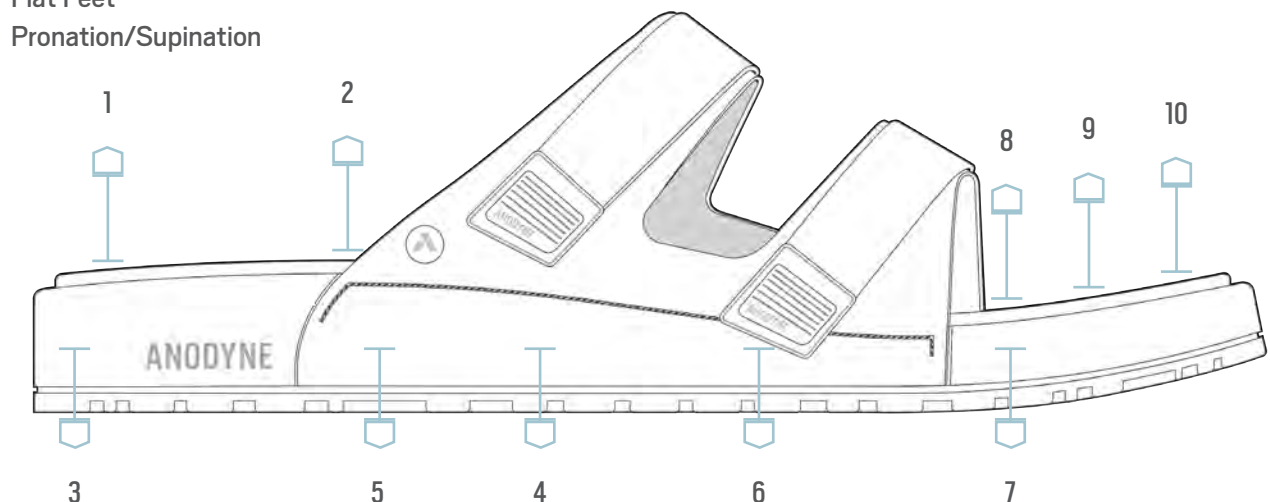

Sandals are the oldest known type of footwear (estimated to be over 10,000 years old). They're the perfect option in warm weather and are always an easy choice when looking for something to slide on or slip off. Although we love the convenience of wearing sandals, they typically don't offer the appropriate level of support, adjustability, and comfort that our feet require.

We've changed that.

Through the culmination of years of research and development, we've meticulously designed a distinctive collection of sandals with maximum adjustability, unparalleled support, and supreme comfort.

**IDEAL FOR THE FOLLOWING FOOT CONDITIONS:**

- Plantar Fasciitis
- Heel Pain/Heel Spurs
- Foot Soreness
- Flat Feet
- Pronation/Supination
